SUPRIYA GHORAI

SOFTWARE ENGINEER | GO (GOLANG) | REST APIs
+91 8927032083 | supriyaghorai.dev@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 2.5+ years of experience building scalable Go services, REST/gRPC APIs, event-driven architectures, and database-driven applications. Experienced in PostgreSQL, Redis, message queues (RabbitMQ, Kafka), internal business tools, operational dashboards, and third-party payment integrations. Focused on high-reliability backend logic, system observability, and turning complex business requirements into practical production software.

TECHNICAL SKILLS

Languages: Go (Golang), SQL, Java (Core fundamentals)
Backend & Architecture: REST APIs, gRPC, Microservices, Event-Driven Architecture, RabbitMQ, Kafka, MQTT
Databases: PostgreSQL, Redis, Supabase
Cloud & Infrastructure: GCP (GCS, Cloud Logging), Docker, Kubernetes, CI/CD, Git
Core Concepts: System Design, Data Structures and Algorithms, Distributed Systems, DBMS

PROFESSIONAL EXPERIENCE

Flurn — Software Engineer (Jan 2024 – Jan 2026) | **Senior Software Engineer (Feb 2026 – Present)**

- Develop and maintain **15+ Go backend services and REST APIs** in Ganymede, supporting core product workflows, internal tools, and sales and operations dashboards.
- Architected and optimized database-backed functionality with PostgreSQL and Redis caching, **reducing average API response latency by 35%** and cutting redundant database read queries by **40%** across internal systems.
- Configured centralized logging and structured alerts using GCP Cloud Logging, streamlining production incident investigations involving third-party API failures and payment timeouts.
- Contributed to an internal marketing-page platform that enables operations teams to create and publish **150+ localized campaign landing pages** for specific areas, accelerating campaign launches by **70%** and streamlining enquiry management.
- Developed an internal URL-shortening and routing tool handling **10,000+ monthly link redirects** to simplify the creation, tracking, and sharing of campaign links across business workflows.

SELECTED PROJECTS

Hermes - Geospatial Teacher Tracking & Automated Check-In
Designed a real-time geospatial workflow supporting **200+ daily active classes**, including journey activation, live MQTT location streams, route visibility, and Haversine-based proximity check-in within a 100-meter radius—reducing manual attendance verification by **80%**. **Tech:** Go, REST APIs, PostgreSQL, Redis, MQTT.

TR GlowCare - Website & Payment Reconciliation
Developed a skincare-service website and implemented an omnichannel payment workflow using Cashfree Orders alongside cash collection, managing **₹30,000+ in monthly transaction** volume. Engineered background payment-status polling and a Supabase audit trail to track payment status in real time and ensure accurate records.
Website: trglowcare.com

Marketing Campaign Platform - Landing Page CMS
Built an internal CMS platform to create, test, publish, and distribute localized marketing pages, enabling operations teams to manage regional campaigns and collect enquiries without repeated engineering involvement.

EDUCATION

Gargi Memorial Institute of Technology (GMIT) | Graduated 2023 | CGPA: 8.7/10
Bachelor of Technology (B. Tech.)
